background

Founded as India's First ERP Software Company in 1989, Visesh Infotecncs Ltd. is now a recognized player in the Indian IT Sector as a creator of Intellectual Property. The Company has since diversified into an end-to-end IT solution provider with offerings that extend from Consulting Services, to Software Development & Implementation, to IT Infrastructure & Network Deployment and also Managed (Outsourced) Services. Visesh today has a global clientele of over 1500 large & mid-size customers and offices across India, Thailand, Singapore & the United States.

Emphasis on quality, world-class human resources and cutting edge solutions drive its commitment. With a successful track record of serving the most demanding customers, Visesh can bring you the benefits of working with a partner with software skills, networking expertise, project management experience and domain knowledge in every aspect of Information Technology.

Visesh has a state-of-the-art software development facility at Bangalore – India's Silicon Valley and another one at Gurgaon – the I.T. hub south of the Capital City of New Delhi. Apart from these we have our ASEAN base at Bangkok, Thailand, with a large strength of software and networking professionals. These facilities recruit and nurture software talent through rigorous training programs. Software development processes at Visesh conform to ISO 9001:2000 Standards.

SOFTWARE DEVELOPMENT

Visesh Infotecnics Ltd. has the customer's needs at its core and ERP as a core competence, which is supported by several other software products and technologies that help deliver a complete solution through its Consulting Services, Infrastructure Products & Services, Software Products & Services and Managed Services.

- ▶ New product development
- ▶ Customized products
- ▶ Product enhancement
- ▶ Modification, conversion & migration of existing applications.

Skills towards the use of powerful computers, advanced equipment, sophisticated software & systems development methodologies and the latest productivity tools are available with our software group to provide high-quality services in the above areas. Regular walk-thru's ensure functionality, reliability and maintainability of software developed by us. Specialised applications can be developed for Local Area Networks as well as Enterprise Wide Networks.

We have honed our skills to the vast requirements of web-related software development and e-commerce applications. For this purpose, we have in place a focussed group of software professionals specifically for this activity. Orders have been executed for the government as well as several large and small enterprises in India and abroad.

SOFTWARE PRODUCTS

Visesh spotted the potential of the Indian Software Industry in its teething stages and developed various enterprise applications and off the shelf software products, which were focused around the customer's business processes. Such products include:

BusinessSoft™ is widely deployed in the Service, Pharmaceutical, Manufacturing, Chemical and Sales & Distribution segments. Rich in functionality, BusinessSoft™ is powered by Visual Basic at the front-end and Oracle or MS-SQL at the backend. BusinessSoft™ applies the power of information technology to our clients' business issues and drive their business processes with greater efficiency, accuracy and predictability. Visesh BusinessSoft™ builds on the winning parameters of our clients' processes and the best industry practices.

BusinessPro™ automates critical functions of a manufacturing organization and can deploy enterprise wide applications that are integrated, scalable and reliable. It makes data available across the enterprise to enable better decisions, faster. It enables better return on investments through cost-effective and faster deployment capabilities. BusinessPro™ is a time tested and proven solution across a variety of businesses, and is a perfect fit for automobile & auto-ancillary manufacturers.

powERP™ is a ready to implement ERP product for the SMB (Small & Medium Business) segment, which packs in all the features that such a business would require at a low initial price along with an implementation time frame of less than a month. The product is NSTL (the world's largest independent testing laboratory for technology products) Certified, and also has received rave reviews from leading I.T. publications.

solutions
unlimited

VRetail™ is our software product offering for the Retail Space, which follows the best international retail practices and has been deployed successfully by several Departmental Stores, Supermarkets and Retail chains in India and overseas. This Point of Sale application is OLE PoS Compliant and supports single location stores, and chains with multiple warehouses and stores. It includes billing, inventory and customer loyalty programs and is available in touch-screen or standard CRT-based versions on PoS terminals or PC-based systems with multi-lingual support.

TransXS™ is our suite of products & managed services in the fast-emerging and high technology service area of Mobile telematics. The rapidly growing mobile communication penetration, coupled with higher Internet bandwidth availability have opened up myriad areas like remote mobile asset tracking through Internet, applications of GPS, GIS, GSM-GPRS technologies to improve upon logistic and transaction efficiency and security, distribution management through portable intelligent terminals and unobtrusive data evacuation. A wide variety of customized applications are made available through ASP platform – thereby reducing initial high risk burden on clients, low entry and trial barrier and easily and quickly demonstrate able quantified results. Visesh has a complete portfolio of developed application programs matched with tested and rugged mobile hardware design, and data center server with communication gateways – all targeted to satisfy customer needs and generate customer delight through comprehensive and fully managed services.

INFRASTRUCTURE SERVICES

InfraServe™ is the name of our Infrastructure Services Division, which designs, builds and manages IT infrastructure for our clients globally, through the effective deployment of hardware, software and networking products from world renowned manufacturers.

Visesh has strong partnerships with global leaders for supply and support of hardware from computers and peripherals to data communication and telecommunication equipment. These products employ contemporary technologies with the best of components and are manufactured under strict quality control for optimal performance. In order to ensure selection and deployment of the solution most suited to our customers' needs and existing hardware/software base, we have several options available in each product range to fulfill the requirement in the most appropriate and cost-effective manner.

Visesh provides the entire range of Servers, Desktop and Notebook computers from HP, IBM, Acer & Sun Microsystems. We offer peripherals from Hewlett Packard, Samsung, Epson Corp. & Canon and Power Correction Equipment from APC. We also provide specialized data communication equipment such as Routers, Switches & Remote Access Servers from Cisco Systems, HP Procurve, Nortel Networks, 3Com and Allied Telesyn; Structured Cabling Systems from Systimax, AMP and Nexans; Wireless connectivity products from Cisco, SMC and NetGear; and storage solutions from HP, IBM, ADIC & EMC.

solutions

Visesh is a Gold Partner for Novell's networking software products such as NetWare Operating System, Suse Linux, ZEN Works, Border Manager, Group-Wise, Manage Wise etc. – products, that have proved their effectiveness in Corporations around the world, making Novell the World's No. 1 Network Software company. We are an Enterprise Partner for Microsoft's suite of software products - the most popular software for the IBM compatible PC range such as Windows Server, SQL Server, Exchange, Office etc. – products that have made Microsoft the World's No. 1 Software company. We are also an Oracle Worldwide Partner – a partnership that helps us position & utilize the world's most secure & popular RDBMS in our solutions to clients. We are a Citrix Partner - the world's leading thin client technology provider. We also have strong partnerships with Network Associates and Computer Associates whose software technologies & products have found a growing acceptance in the networked world.

Visesh has a dedicated team catering to the requirements of Messaging & Workflow solutions for its clients on Novell, Microsoft, Oracle & Lotus platforms. This team has worked extensively on solutions in vertical segments like banking, finance and telecom, deploying contemporary technologies like Directory Services.

Visesh has field-proven expertise in all aspects of networking viz. Voice and Data Switching, X.25, Frame Relay, ATM, VLAN, SNA and APPN, TCP/IP, Satellite, Radio and Fiber-Optic Transmission, Local Area Networks (LAN), Wide Area Networks (WAN) and Communication Software. We provide a comprehensive set of services for your networking requirements, plan and design the appropriate network; procure necessary hardware and software; install the network; train user personnel; and provide long-term support.

Besides designing we also help in management of the network by integrating multi-vendor products. We provide professional assistance in planning the management and operation of our customers' networks. This maximizes the efficiency of both the network resources and network management personnel, because, no matter how well the network has been planned with regard to its configuration and facilities, its full potential can only be realized through effective network management.

With our thrust on the total solution approach, hardware by itself is meaningless. Our clients have the benefit of appropriate selection of hardware towards the fulfillment of their computing needs, keeping in view the applications and systems options available. However, as needs are bound to grow with time, we provide our valued clients with easy upgrade paths. We also provide comprehensive maintenance support for all equipment supplied by us, while taking on third party maintenance on a case-to-case basis for our clients' existing hardware.

Lapps.Biz™ is our e-Commerce portal that provides mobility devices (laptops, hand-helds etc.) & applications to the upwardly mobile retail buyer at the click of a mouse. The portal selects high quality products from leading IT manufacturers globally and makes them available through a reliable logistics network spanning our multiple offices & warehouses in India and overseas, to a buyer at attractive charges payable through a secure payment gateway. Warranty services for such products are provided through the manufacturer's Support Network world-wide, as per standard policy, and supported through an in-house Help Desk managed by our contact center based out of Gurgaon.

WEB SERVICES

SignDomains™ is India's first ICANN Accredited domain registrar which offers on-line domain registration of top level domains (TLD) including .com .net .org .info .biz .in etc. Catering to a global client base through its on-line presence and secure payment gateway, SignDomains has several corporates, large portals, resellers and end-users as its clientele. The growing reach and popularity of the Internet, provide this Business Division with unending potential and we are now signing up channels in other parts of the world to grow this business further.

StepOne™ – a first step towards a small business establishing a global presence through the Internet. This package is a creation of our web development team (V-APPS™) which has utilized its expertise to create self-generating websites on professionally designed template options, with on-line submission of text & graphics by prospective clients. The package includes domain registration, 10 MB of hosting space and five e-mail accounts, apart from the web-site design at a very affordable price, due to which many organizations have been able to make a statement of their aspirations to a global audience.

InfraSurf™ offers web-hosting solutions on our dedicated servers located at in server farms and data centers in India and the US. Value added services like SMS, payment gateways, messaging, e-identity management, e-commerce are available for corporate clients and other businesses. Our capabilities in design & upkeep of secure infrastructure with built-in redundancies and data back-up processes ensure the reliability and success of this service and also affords us an opportunity to leverage this infrastructure for our Managed Service and ASP offerings.

MANAGED SERVICES

VConnect™ recognizes that customer support has become integral to organizational success. It is for this reason that call centers have made a niche for themselves. In a world of ruthless competition, survival is the keyword - which involves not only a vibrant and dynamic attitude while carrying out business but also ensuring flawless customer support service. At VConnect we offer managed services, specifically designed to maximize the efficiency of our clients' direct marketing efforts or be a part of their technical support team. This is done through well equipped, contact centers and call centers that are manned by skilled professionals that understand our clients' business requirements and knowledge processes thus, providing our overseas clients with a cost-effective option to maintain high levels of response and customer support, around-the-clock, in a prompt, professional and courteous manner; hence enhancing their business.

InfraServe™ provides trained network administrators, engineers, operators and system managers to fill in the gap between implementation of IT infrastructure and development of in-house skills. This ensures, that the system operates smoothly till such time as the in-house staff is trained to take over the operations. In cases where our clients want us to provide facility management services on long term basis, we can dedicate a team of systems managers, engineers, programmers and administrators to ensure smooth and trouble free operations.

CONSULTING SERVICES

Visesh offers expert consultancy to organizations embarking on computerization or upgrading their networks. We can evaluate various software and hardware products available in order to provide our clients with a technically appropriate and cost effective solution. Our vast experience in ERP and business applications gives us that cutting-edge required from a business consulting organization, since we have the requisite expertise in functional areas like finance, manufacturing, sales & distribution, human resources management, supply chain management, customer relationship management, fleet management etc. While our technology services in the realm of IT infrastructure, security, data mining, networking etc. give us that extra edge required of a technology oriented, business consulting firm.

Technical assistance from us could also cover feasibility studies, staffing requirements, training on systems & applications, environmental engineering of computer sites, systems audit and systems integration, involving interconnection of heterogeneous systems, merging hardware, software and communications products of diverse origins to form a single source solution.

Clients may avail of one or more of our specialized services, or retain the expertise of a multidisciplinary team for an entire project cycle of inter-related specialist services.
